

# Hurlstone Agricultural High School

## Works notification

20 June 2022

Dear community,

In May 2022, we notified you that site preparation works, demolition and asbestos removal would take place as per the site map overleaf.

During these works, the Contractor has identified additional material in the pool pump room that is suspected to contain asbestos. Please note the pool and immediate surrounds are within the construction site and is not accessible to students and staff. Approved control measures and air monitoring are in place.

Works to remediate the pool pump room will start on 04 July 2022 and are expected to be completed within two days.

Remediation works at Buildings B and C are continuing following a slight delay and are expected to be completed by Friday 05 August, 2022.

All areas (Building B, Building C, and the pool area) will be remediated in accordance with SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing will be completed to ensure these areas have been fully remediated. A clearance certificate will be issued by an independent asbestos assessor before demolition works begin.

The health, safety, and well-being of the school and the local community are our highest priority, and we will continue to keep the community updated.

Thank you for your patience while we deliver this important school infrastructure.
