Outcomes**

MS11-1	uses algebraic and graphical techniques to compare alternative solutions to contextual problems
MS11-2	represents information in symbolic, graphical and tabular form
MS11-3	solves problems involving quantity measurement, including accuracy and the choice of relevant units
MS11-4	performs calculations in relation to two-dimensional and three-dimensional figures
MS11-5	models relevant financial situations using appropriate tools
MS11-6	makes predictions about everyday situations based on simple mathematical models
MS11-7	develops and carries out simple statistical processes to answer questions posed
MS11-8	solves probability problems involving multistage events
MS11-9	uses appropriate technology to investigate, organise and interpret information in a range of contexts
MS11-10	justifies a response to a given problem using appropriate mathematical terminology and/or calculations

Outcomes

- MA11-1** uses algebraic and graphical techniques to solve, and where appropriate, compare alternative solutions to problems
- MA11-2** uses the concepts of functions and relations to model, analyse and solve practical problems
- MA11-3** uses the concepts and techniques of trigonometry in the solution of equations and problems involving geometric shapes
- MA11-4** uses the concepts and techniques of periodic functions in the solutions of trigonometric equations or proof of trigonometric identities
- MA11-5** interprets the meaning of the derivative, determines the derivative of functions and applies these to solve simple practical problems
- MA11-6** manipulates and solves expressions using the logarithmic and index laws, and uses logarithms and exponential functions to solve practical problems
- MA11-7** uses concepts and techniques from probability to present and interpret data and solve problems in a variety of contexts, including the use of probability distributions
- MA11-8** uses appropriate technology to investigate, organise, model and interpret information in a range of contexts
- MA11-9** provides reasoning to support conclusions which are appropriate to the context

Outcomes

- ME11-1** uses algebraic and graphical concepts in the modelling and solving of problems involving functions and their inverses
- ME11-2** manipulates algebraic expressions and graphical functions to solve problems
- ME11-3** applies concepts and techniques of inverse trigonometric functions and simplifying expressions involving compound angles in the solution of problems
- ME11-4** applies understanding of the concept of a derivative in the solution of problems, including rates of change, exponential growth and decay and related rates of change
- ME11-5** uses concepts of permutations and combinations to solve problems involving counting or ordering
- ME11-6** uses appropriate technology to investigate, organise and interpret information to solve problems in a range of contexts
- ME11-7** communicates making comprehensive use of mathematical language, notation, diagrams and graphs

Course	Sport, Lifestyle and Recreation	Supervising faculty	PDHPE
---------------	--	----------------------------	--------------

Outcomes

- 1.1 applies the rules and conventions that relate to participation in a range of physical activities
- 1.2 explains the relationship between physical activity, fitness and healthy lifestyle
- 1.3 demonstrates ways to enhance safety in physical activity
- 1.4 investigates and interprets the patterns of participation in sport and physical activity in Australia
- 1.5 critically analyses the factors affecting lifestyle balance and their impact on health status
- 1.6 describes administrative procedures that support successful performance outcomes
- 2.1 explains the principles of skill development and training
- 2.2 analyses the fitness requirements of specific activities
- 2.3 selects and participates in physical activities that meet individual needs, interests and abilities
- 2.4 describes how societal influences impact on the nature of sport in Australia
- 2.5 describes the relationship between anatomy, physiology and performance
- 3.1 selects appropriate strategies and tactics for success in a range of movement contexts
- 3.2 designs programs that respond to performance needs
- 3.3 measures and evaluates physical performance capacity
- 3.4 composes, performs and appraises movement
- 3.5 analyses personal health practices
- 3.6 assesses and responds appropriately to emergency care situations
- 3.7 analyses the impact of professionalism in sport
- 4.1 plans strategies to achieve performance goal
- 4.2 demonstrates leadership skills and a capacity to work cooperatively in movement context
- 4.3 makes strategic plans to overcome the barriers to personal and community health
- 4.4 demonstrates competence and confidence in movement contexts
- 4.5 recognises the skills and abilities required to adopt roles that support health, safety and physical activity

--------	-------	---------------------	-------

Outcomes

- P1** identifies and examines why people give different meanings to health and to physical activity
- P2** explains how nutrition, physical activity, drug use and relationships affect personal health
- P3** recognises that health is determined by socio-cultural, economic and environmental factors
- P4** identifies aspects of health over which individuals can exert some control
- P5** plans for and can implement actions that can support the health of others
- P6** proposes actions that can improve and maintain personal health
- P7** explains how body structures influence the way the body moves
- P8** describes the components of physical fitness and explains how they are monitored
- P9** describes biomechanical factors that influence the efficiency of the body in motion
- P10** plans for participation in physical activity to satisfy a range of individual needs
- P11** assesses and monitors physical fitness levels and physical activity patterns
- P12** demonstrates strategies for the assessment, management and prevention of injuries in first aid settings (Option 1)
- P13** develops, refines and performs movement compositions in order to achieve a specific purpose (Option 2)
- P14** demonstrates the technical and interpersonal skills necessary to participate safely in challenging outdoor recreation activities (Option 4)
- P15** forms opinions about health-promoting actions based on a critical examination of relevant information
- P16** uses a range of sources to draw conclusions about health and physical activity concepts
- P17** analyses factors influencing movement and patterns of participation

Outcomes

- BIO11/12-1** develops and evaluates questions and hypotheses for scientific investigation
- BIO11/12-2** designs and evaluates investigations in order to obtain primary and secondary data and information
- BIO11/12-3** conducts investigations to collect valid and reliable primary and secondary data and information
- BIO11/12-4** selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media
- BIO11/12-5** analyses and evaluates primary and secondary data and information
- BIO11/12-6** solves scientific problems using primary and secondary data, critical thinking skills and scientific processes
- BIO11/12-7** communicates scientific understanding using suitable language and terminology for a specific audience or purpose
- BIO11-8** describes single cells as the basis for all life by analysing and explaining cells' ultrastructure and biochemical processes
- BIO11-9** explains the structure and function of multicellular organisms and describes how the coordinated activities of cells, tissues and organs contribute to macroscopic processes in organisms
- BIO11-10** describes biological diversity by explaining the relationships between a range of organisms in terms of specialisation for selected habitats and evolution of species
- BIO11-11** analyses ecosystem dynamics and the interrelationships of organisms within the ecosystem

Course	Design & Technology	Supervising faculty	TAS/LOTE
---------------	---------------------	----------------------------	----------

Outcomes

- P1.1** examines design theory and practice, and considers the factors affecting designing and producing in design projects.
- P2.1** identifies design and production processes in domestic, community, industrial and commercial settings.
- P2.2** explains the impact of a range of design and technology activities on the individual, society and the environment through the development of projects
- P3.1** investigates and experiments with techniques in creative and collaborative approaches in designing and producing.
- P4.1** uses design processes in the development and production of design solutions to meet identified needs and opportunities.
- P4.2** uses resources effectively and safely in the development and production of design solutions.
- P4.3** evaluates the processes and outcomes of designing and producing.
- P5.1** uses a variety of management techniques and tools to develop design projects
- P5.2** communicates ideas and solutions using a range of techniques
- P5.3** uses a variety of research methods to inform the development and modification of design ideas.
- P6.1** investigates a range of manufacturing and production processes and relates these to aspects of design projects
- P6.2** evaluates and uses computer-based technologies in designing and producing.

Outcomes

- P1.1** identifies the scope of engineering and recognises current innovations
- P1.2** explains the relationship between properties, structure, uses and applications of materials in engineering
- P2.1** describes the types of materials, components and processes and explains their implications for engineering development
- P2.2** describes the nature of engineering in specific fields and its importance to society
- P3.1** uses mathematical, scientific and graphical methods to solve problems of engineering practice
- P3.2** develops written, oral and presentation skills and applies these to engineering reports
- P3.3** applies graphics as a communication tool
- P4.1** describes developments in technology and their impact on engineering products
- P4.2** describes the influence of technological change on engineering and its effect on people
- P4.3** identifies the social, environmental and cultural implications of technological change in engineering
- P5.1** demonstrates the ability to work both individually and in teams
- P5.2** applies management and planning skills related to engineering
- P6.1** applies knowledge and skills in research and problem-solving related to engineering
- P6.2** applies skills in analysis, synthesis and experimentation related to engineering
