

HURLSTONE

AGRICULTURAL HIGH SCHOOL

Dear parents, carers and year 12 students,

I do hope this email finds you well. It is a difficult and challenging time for all our families, but none so more than our year 12 cohort, 2021.

I have been absent on medical leave and my senior executive team have been working hard to get to your family any communication as soon as it becomes available. I am extremely proud of their work at this time.

The advice and information comes very quickly and changes often. I understand the level of frustration we all share as at times we are all being told about the changing landscape in the media. Unfortunately, not all that has been reported in the media is always correct. Thank you for your understanding.

If you have already placed your name on the vaccination list last week you should get a link.

Please let me know directly via email if you do not receive a vaccination link so I can escalate your concern.

It is important to note that NSW Health are unable to provide information for principals on individual bookings. Schools are not advised of the students who have booked or their booking times.

Students and parents should direct enquiries related to their vaccination booking or the operation of the vaccination centre to the NSW Health Qudos Bank Arena Vaccination Centre on **1800 922 886**.

I am currently sending additional eligible students details to NSW Health- those who were not on the schools original list.

I have also requested support letters for our boarding students currently residing in their regional and rural settings.

Please visit the following link for all information regarding HSC exam advice and student vaccinations:
